EDUCATION

University of North Florida, Jacksonville, FL

Undergraduate coursework towards Bachelor of Science (Psychology).

General Assembly, New York, NY

JavaScript focused workshops and classes.

Independent Study

Lynda, Codecademy, Treehouse.

UC Berkeley,

I hope this finds you well.

I am a Software Developer in the Public Affairs department who came across your job listing while researching new opportunities. UC Berkeley is a forward thinking institution with a vision and culture I would love to continue with for years to come.

I have more than four years of experience with JavaScript, jQuery, PHP, MySQL, SCSS/LESS, WordPress, HTML5, CSS3, Git, and other technologies. I also have a year of experience with React. I have worked as part of Agile teams, both remotely and on-site. I would appreciate the opportunity to speak with you about how I could contribute to your goals.

I am currently working on a contract with UC Berkeley (Public Affairs) and will be available to start a new position soon. You'll see that my personal GitHub is relatively empty, as the contributions I've made to Public Affairs and my previous employers are proprietary and closed source.

My resume is attached. Please feel free to contact me at your convenience with any questions. Thanks for your time.

Best,

Tanise Williams
